## Read this before you take the test!

### Remember

- tests reveal skills you've mastered, not your value as a person;
- stressing out only makes things harder, so try to relax;
- read directions carefully before you begin each section;
- you have 30-45 seconds for each question;
- your first guess after reading all the options is usually right;
- if you don't know the answer, use process of elimination or skip the question and go back to it after you've finished the section;
- test corrections or clarifications may be written on the board;
- no notes are allowed, but you can ask the teacher for help;
- do not talk to other students during the test—the appearance of cheating may invalidate your whole test;
- do not leave with a test or scantron form, even if blank; and
- if you need more time, come back after school; the test must be completed on the same day you started it.

### Filling in your answers

I will not hand-score your multiple-choice answers, so make sure that your marks are neat and sufficiently dark.

If you think the need to use a #2 pencil is a myth, do what you must and accept responsibility for the outcome.
